Our 3 pillars of competence

Stretch hoods

Stretch hood machines

Packaging optimization

Free analysis of your CO₂-balances to optimize the packaging process.
Our PCF is certified or audited.

For securing loads and protecting against dust, weather conditions and theft

- **High load security:** Safe transport of the products, no damage or slipping of the packaged goods, causing no complaints from the customer or the load securing inspection.
- **Optimal puncture resistance:** Even sharp-edged products such as bricks, boxes, sacks, etc. are safely packed without holes.
- **High stretchability:** A wide variety of pallet sizes and product shapes can be packed with one size of stretch hood – the film adjusts perfectly to the individual load unit.
- **Protection against dust and elements:** The packaged goods arrive at your customer free of contamination (dust, humidity, insects, ...). Your product will be delivered in a clean and undamaged condition.

TECHNICAL FEATURES

| DUO ROBUSTA | FLEXIBLE | STRONG | EARTH | YELLOW BACK |
|------------------|--|----------|-----------------|--|
| Variation | EVA | EVA-free | 30 % - 35 % PCR | 35 % PCR, including > 38 % from the Yellow Bag |
| Film perimeter | 1.400 - 4.600 mm | | | |
| Film thickness | 30 – 150 µm | | | |
| Colouring | natural transparent, white, black | | | |
| Prestretch ratio | up to 100 % | < 70 % | < 70 % | < 70 % |
| Printing | one-colour / dual-sided | | | |
| Perforation | hole diameter 8 mm, max. 10 holes in a row | | | |
